## SUMMARY OF VILLAGE INVOLVEMENT

This has been noted in the Data Gathering section above, but is summarized here.

From the beginning the aim was to ensure inclusion of all sections of the Village. Meppershall is classified as a large village, with a population of approximately 1500 people occupying some 700 dwellings. The questionnaire shows that whilst 18 percent work in the village, either directly employed or working from home, most of those that work commute from the village.

The Steering Group members undertook to visit and consult with as many groups as possible. Their findings were translated into the questionnaire.

An excellent return for an anonymous survey was achieved, with 43.85% of households and 44.87% of the population represented in the results.
